

GENERATE A SYNTHESIS

SOME METHODOLOGICAL HINTS

Co-funded by the
Erasmus+ Programme
of the European Union

Using the research findings from our investigations, the metaschool has to develop a synthesis that shows a clear understanding of the challenge.

Neuromentors will proceed like this:

- 1) All the students have to work together, discussing every answer they – as a group – has to offer.
- 2) They have to answer, one by one, all the guiding questions.
- 3) They have to organize the information of the steps that have led to the conclusions.
- 4) They have to give and write a conclusion.
- 5) They have to make a video including the points 3) and 4) of this list: steps + conclusions

IN THE PILOT,

1. If we are together, we also give an answer to the guiding questions and make a video of the steps and conclusions.
2. If we are not together, we share each country's videos through the platform.
